James D. No

james.d.no@outlook.com · linkedin.com/in/james-no · github.com/james-no

Former Top Secret/SCI Clearance · Granted 2018 · Inactive since May 2024 · Previously adjudicated favorable

EDUCATION

Bachelor of Science in Computer Science · Skagit Valley College · GPA: 3.93 — Expected June 2027

Relevant Coursework: Security Foundations, Algorithmic Problem Solving, Principles of Computer Systems (in progress), Data Structures & Algorithms I–II, Databases & Information Management, Software Engineering, Web Application Programming, Discrete Structures I–II, Linear Algebra for Data Analysis, UI/UX, Cloud Basics

Bachelor of Science in Psychology · Washington State University — May 2013

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: Spring Boot, Spring Security, React, Vite, Tailwind CSS, Axios, Maven

Databases: PostgreSQL, MongoDB

Cloud & Tools: Azure OpenAI (GPT-4), REST APIs, Render, Netlify, Git/GitHub, Visual Studio Code, Microsoft Excel

Security: JWT authentication, role-based access control (RBAC), CORS, secrets management

TECHNICAL PROJECTS

Task Mentor | Full-Stack Web Application — CS 301 · Fall 2025

Java 21, Spring Boot 3, React 18, PostgreSQL, JWT · github.com/don-strong/task-mentor · 4-person team · Deployed to Render + Netlify

- Led QA and deployment for a 4-person engineering team building a mentor-student marketplace; designed and executed testing across 15+ features including JWT authentication, role-based access control, booking workflows, and multi-filter mentor search
- Managed end-to-end production deployment configuring Spring Boot backend on Render and React frontend on Netlify, handling environment variables, CORS policies, and JWT secrets for a fully deployed live application
- Authored complete technical documentation: system architecture overview, REST API contracts, step-by-step local setup guide, and a comprehensive QA testing report covering functional and edge-case testing across the full feature surface

Interview Practice Bot | AI Interview Coach

Python, Azure OpenAI GPT-4.1, Multi-turn Conversation · github.com/james-no/interview-practice-bot

- Built a conversational AI interview coach using Azure OpenAI GPT-4.1 that conducts role-specific mock interviews across 5 structured phases: setup, question generation, per-answer evaluation, targeted feedback, and scored session summary
- Implemented full conversation history management maintaining complete session context across unlimited exchanges, enabling coherent evaluation of answer quality and communication trajectory throughout the interview
- Designed a structured evaluation pipeline rating responses on completeness, clarity, technical accuracy, and communication, producing a specific, ranked improvement report at session end

Open Energy Dashboard | Open-Source Contributor

JavaScript, TypeScript, Mocha, CI/CD · github.com/OpenEnergyDashboard/OED · 485 forks · 112 GitHub stars

- Implemented and merged a test case for 7-day bar chart rendering of grouped flow meters in a production open-source platform serving energy utilities across 3 continents, coordinating with maintainers to meet project standards
- Navigated a CI/CD-enforced contribution workflow in a 250+ contributor, 485-fork codebase — from issue identification through pull request review cycles and final merge

PROFESSIONAL EXPERIENCE

Geospatial Intelligence Imagery Analyst | U.S. Army — August 2018 – May 2022

- Promoted to Sergeant (E-5) in just over two years, ahead of peer cohort; named to Commandant's List at the Basic Leader Course and awarded Army Achievement Medal for service in Korea
- Produced imagery intelligence as senior analyst in a SCIF; trained junior soldiers on analysis tradecraft for time-sensitive reporting in a classified operational environment
- Authored standard operating procedures for imagery analysis missions, formalizing oral processes to improve consistency across team rotations and accelerate analyst onboarding
- Coordinated intelligence sharing across South Korean partners and multiple U.S. military agencies, maintaining operational continuity across organizational and language boundaries

Front of House Supervisor | Harbor Sushi (Family Business) — 2022 – 2023

- Supervised a team of three in a high-volume restaurant; onboarded the business onto DoorDash and ran full operations (staff, inventory, vendors, financials) for one month during the owner's absence
